# NTDs clinical trials in Africa

# Using & strengthening research capacities in endemic regions

## A Key Role for Regional Disease Platforms

- Defining patient needs and Target Product Profile (TPP)
- Strengthening local capacities
- Conducting clinical trials (Phase II/III studies)
- Facilitating Registration of new therapies
- Accelerating implementation of new therapies, ensure therapies reach patients

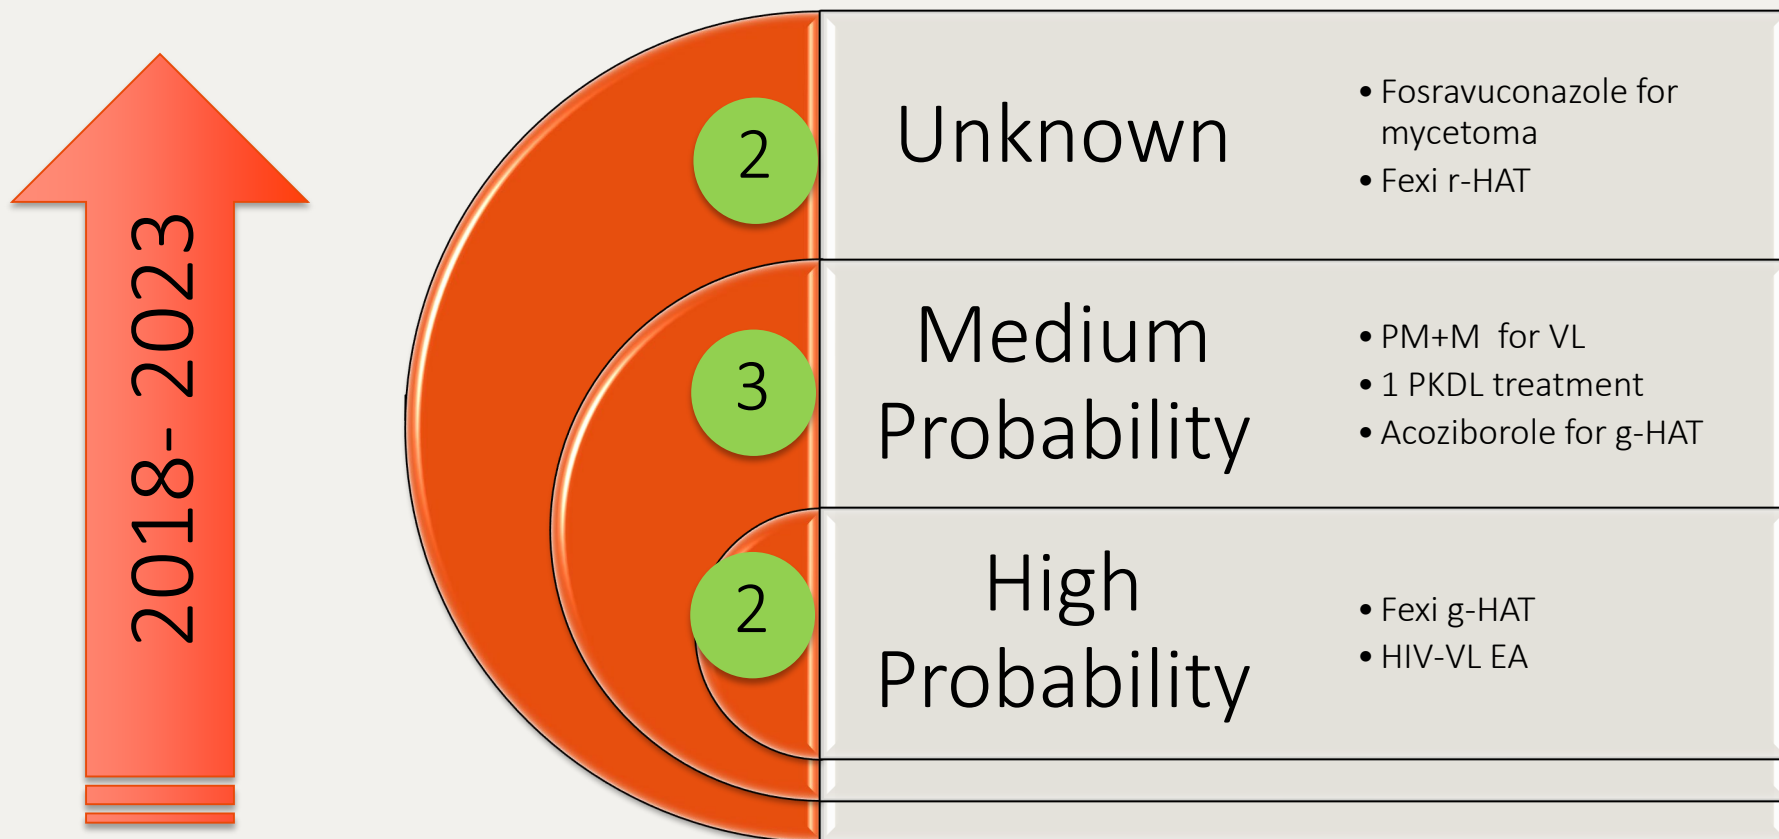

As well as the Filariae network

LEISHMANIASIS

# Draft projection of deliverable new treatments for NTDs in Africa by 2023
